Equipping Farmers International

2024 ANNUAL REPORT

DIRECTOR'S STATEMENT

DEAR EFI SUPPORTERS,

Your unwavering support of EFI has been instrumental in our remarkable achievements this past year. Through your generosity, we've enhanced food security, improved livelihoods, and created sustainable income sources for local ministries. Your contributions have empowered the Church to implement biblical regenerative agriculture discipleship, fostering both spiritual and physical growth in our communities.

2024: A Year of Remarkable Growth and Impact

- Educational Excellence: Partnered with Dordt University to complete the International Certification in Conservation Agriculture (ICCA).
- Global Expansion: Extended reach into over 50 countries, bringing hope and sustainable solutions worldwide.
- Leadership Growth: Welcomed regional directors for East Africa and East Asia.
- Nurturing Young Hearts: Developed an engaging children's curriculum in South Asia.
- Team Strengthening: Significantly grew our international team to 30 wonderful and super gifted people.
- Empowering Agricultural Entrepreneurs: Initiated planning on an agribusiness curriculum.
- Spreading the Word: Showcased EFI's mission at five major events.
- Expanded to over 60 partnerships worldwide.
- Training Impact: Equipped nearly 1,000 trainers with knowledge to train others in sustainable agriculture, impacting countless farmers with improved food security and incomes.

- Trained just under 5000 farmers directly helping them each have food security and improved livelihoods from now on
- Saw documented spread of our training through four generations from our staff to trainers and farmers who adopted it and shared it with others

The downstream effect has been staggering, with one partner alone training over 2,000 farmers using our program in 2024.

Vision for 2025

As we look ahead, we're excited about the opportunities God has placed before us:

- Global Impact Explosion: Reaching 60+ countries and conducting 100+ training events.
- Cultivating Future Leaders: Expanding our agricultural internship program
- Innovative Outreach: Partnering with Chalmers International on integrating agriculture and savings groups, adapting our children's curriculum globally, developing a specialized curriculum for deaf communities, and creating an oral learning program.
- Adding a Caribbean and North American region
- Hope in Challenging Places: Venturing into Haiti and into a country we can't name but it is one of the most closed countries in the world with the greatest need for food security and the gospel.
- Strategic Growth: Fine-tuning our approach in all international regions and expanding our dedicated team.

Your support and generosity is the catalyst for this incredible growth. Together, we're transforming lives, restoring hope, and cultivating God's love in every seed we plant. Will you join us in making 2025 our most impactful year yet?

FRANK SINDLER

Executive Director

ABOUT EFI

EFI's approach offers majority world churches the possibility of becoming financially independent. The conservation agriculture-based trainings equip church leaders to disciple their members to practice fruitful stewardship of their land and resources.

With just a portion of their land, church members can become food secure and financially stable in such a way that the church can support its own pastor and even achieve community outreach goals.

OUR MISSION

EFI exists to engage the global church in agricultural discipleship that results in food security and improved livelihoods.

OUR VISION

EFI envisions a network of churches collaborating to eradicate hunger and food insecurity globally through sustainable conservation agriculture.

OUR REACH IN 2024

Countries

REGIONAL OVERVIEWS

LATIN AMERICA

In 2024, EFI continued to expand its presence in the Latin America region, serving countries including Colombia, Honduras, Venezuela, Panama, Brazil, and Mexico. This year, we trained **60 trainers** and **250 farmers** directly and indirectly, fostering a strong foundation for agricultural discipleship and community development.

Key Scripture

Our regional theme is rooted in **Matthew 28:19-20**, guiding our mission to make disciples of all nations through sustainable agriculture and spiritual growth.

Key Achievements

1. Trainer Team in Colombia: We established a team of 12 trainers in Colombia, who will conduct trainings in the coastal region. We are also in discussions with Compassion to collaborate with CIPEP, aiming to train approximately 1,500 churches in the region.

2. Presbyterian Church Partnership in Brazil: In Brazil, we connected with a pastor from the Presbyterian Church, who is also a scientific agronomist. He will lead a project to train all Presbyterian churches in the state of Pernambuco.

3. Training Center in Panama: We established a Training Center in Panama, featuring demonstration plots for corn, beans, vegetables, herbs, and compost. This facility will serve as a hub for training ICCA trainers from the U.S. and Latin America, as well as interns from U.S. universities and missionaries preparing for global missions.

4. Regional Team Development: We built a Latin America EFI team consisting of country leaders and administrative volunteers. This team will coordinate and operate trainings across Latin America.

MATTHEW 28:19-20

Go therefore and make disciples of all nations, baptizing them in the name of the Father and of the Son and of the Holy Spirit, teaching them to observe all that I have commanded you. And behold, I am with you always, to the end of the age."

Strengthening Faith Through Agricultural Discipleship
Agricultural discipleship has profoundly impacted the faith of farmers in our region. By integrating farming into community projects, we have seen:

- **Increased Church Attendance:** Unbelieving farmers have started attending church after participating in our training programs, as churches use agriculture to disciple people daily.
- **Sustainable Practices:** Churches have adopted sustainable farming methods, increasing production and impacting community sustainability. This has created opportunities for churches to preach the Gospel and teach farming practices.
- **Environmental Stewardship:** Farmers have become more conscious of caring for God's creation, leading to a deeper spiritual awareness. For example, a 70-year-old farmer expressed remorse for past environmental neglect and sought forgiveness.
- **Restored Hope:** Improved agricultural results have restored hope among farmers who were considering leaving the sector due to declining land fertility.

Success Stories
Pastor Luis in Colombia: Pastor Luis compared traditional and conservation agriculture methods, achieving five times higher yields with conservation practices. This success has led community members to seek his guidance, transforming skepticism into adoption of sustainable methods.
Armonía Ministries in Mexico: Armonía Ministries involved indigenous students in sustainable projects to produce food for their facility, reducing expenses and potentially generating income. This initiative combines theological education with practical agricultural skills.

Improved Food Security and Church Engagement
- **Financial Independence in Colombia:** In the community of El Toche, farmers who attended our training were able to return to full-time agriculture, achieving higher yields and fulfilling their dream of sustaining their families and earning extra income.
- **Increased Church Engagement:** In rural communities, improved agricultural practices have attracted non-churchgoers who seek to learn from successful church members. This has opened opportunities for discipleship programs and increased community engagement with churches.

Future Outlook
For the coming year, our priorities include:
- **Trainer Development:** Building a team of 20 to 30 high-quality trainers to serve globally.
- **Regional Expansion:** Operating multiple projects simultaneously across countries like Colombia, Brazil, Guatemala, Honduras, Mexico, Venezuela, and Ecuador.
- **Methodology Adoption:** Increasing the adoption of our agricultural discipleship program in more churches and denominations.

New Initiatives
- **New Projects:** We will be starting to work on a project with Compassion International in Colombia to train 500 farmers and 20 trainers in the first year of the project and looking forward to extend that project to 10 years to train more than 1000 churches in the network of Compassion in the coastal region of Colombia.

WEST AFRICA

In 2024, Equipping Farmers International (EFI) significantly impacted the West Africa region, serving 12 countries. This year, we trained **150 trainers** and reached **2,380 farmers** directly and indirectly, fostering agricultural development and spiritual growth.

Key Scripture

Our regional theme is inspired by Jeremiah 29:11. In a context often influenced by the prosperity gospel, this verse helps reframe God's blessing, showing that His provision and grace are present in the soil and rain, available today, rather than something that needs to be earned through specific prophets or payments. EFI helps people recognize the blessings God has already provided for their families within their land.

JEREMIAH 29:11

"For I know the plans I have for you," declares the LORD, "plans to prosper you and not to harm you, plans to give you hope and a future."

Key Achievements

1. Nigeria Partnership: The Decapolis Center fully adopted EFI's methods, leading to nearly 1,000 farmers trained in impoverished communities. The Director of an Interfaith IDP camp in Abuja also implemented the training, enabling refugees to create compost.

2. Cameroon Growth: Following a single training event in October 2024, several pastors independently adopted EFI methods, started compost piles, and began training their congregations, generating numerous requests for further training.

3. Highland Rice Success: EFI's water conservation principles enabled the successful cultivation of highland rice in Liberia and Burkina Faso without supplemental irrigation, impressing many, as rice is typically thought to require wet paddies.

Strengthening Faith Through Agricultural Discipleship

Agricultural discipleship has been crucial in countering the prevalent mindset in some West African churches that focus on curses and earning God's blessing. EFI demonstrates that God's blessings are abundant and present, not withheld. In Liberia, for instance, many felt the country was cursed, leading people to emigrate. However, through EFI practices, congregation members like Eleazar's have seen tangible evidence of God's blessing in Liberia, renewing faith and countering despair.

Financial Independence and Food Security

While widespread financial independence for churches is still developing, EFI is building on the existing reliance on farming for church sustenance. In regions like Ivory Coast, Mali, Niger, and Burkina Faso, many Assembly of God churches are supported primarily through farming. As EFI methods lead to doubled harvests, food security increases, contributing to church stability. A clear example comes from Liberia, where pastors partnered with Equipping Leaders International have indicated they will require only half their traditional external funding due to improved agricultural outputs.

Increased Church Engagement and Growth

Improved agricultural practices have directly led to church growth and engagement:

- **Burkina Faso Church Plant:** In Dapelogo, the Presbyterian Church of Burkina Faso used EFI farming methods as an outreach tool, leading to the planting of a new church. Pastor Remi Ouedraogo, displaced from North Burkina Faso, saw farming as a vital way to start a new ministry, and the community witnessed God's blessing through improved agriculture, renewing their desire for worship.
- **Cameroon SIM Partnership:** After an EFI training, 6 pastors began implementing the methods and partnering with SIM (Serving In Mission). This renewed interest reversed SIM's potential withdrawal from Cameroon, leading to investment, particularly with a Fulani church in the north, where missionary Levi Mbah is helping them achieve financial stability through farming.

Discipleship and Spiritual Growth

The agricultural training program fosters deeper discipleship by allowing leaders to work alongside participants. By traveling to villages and training farmers (as exemplified by an urban church plant in Ouagadougou, Burkina Faso), the church demonstrates tangible care for families. This builds community, increases participation, and fosters a willingness to support the church, as members see it as a source of blessing and practical help beyond Sunday worship.

Success Stories

- **Nigeria - Women Farmers:** Crystal and Ralph observed significant harvest increases, especially among women experimenting with EFI methods in small plots near their homes. This improved yield allows mothers to provide food while staying closer to home to care for children.
- **Sierra Leone - Water Conservation:** In Mapoli, farmers adopted EFI principles to grow corn for themselves and their chickens. Despite the nearest water source being over a mile away, the water conservation techniques enabled successful yields, supporting their poultry farming ventures.

- **Wells being dug in Gambia and Burkina Faso:** We have successfully started well digging programs in Gambia and Burkina Faso where over 20 wells have been dug by hand by members of the local communities providing clean water for families and opportunities for farmers to expand into vegetable gardening during the dry season.

Future Outlook

Our key priorities for the upcoming year focus on sustainable growth and impact:

1. **Developing Local Trainers:** We aim to empower second and third-generation trainers to lead trainings within their communities. To ensure quality, we have developed training manuals (English/French) and started using the Enable platform via WhatsApp (initially in Nigeria) for accessible guidance.
2. **Strategic Partnerships:** We need to partner with organizations capable of funding their own EFI training sessions. Building networks with groups like Equipping Leaders International will allow us to leverage our existing trainer base and infrastructure for exponential growth.
3. **Enhancing Sustainability:** Beyond increasing yields, we will focus on improving food security and financial stability by addressing market access, crop storage, and developing dry-season income streams (e.g., vegetable gardens, agroforestry). This may involve creating cooperatives and potentially investing in infrastructure like wells, as identified by the Presbyterian Church in Dapelogo, Burkina Faso.
4. **Develop a Well Training Center:** In Gambia we are in the process of partnering with Water for All International to start a well digging center to provide training for national leaders to learn how to dig wells cheaply by hand. This will allow us to start well digging programs throughout West Africa to provide clean water for those in rural communities.

Planned Expansions

We anticipate expanding EFI's reach into Mali and Guinea in the coming year.

EAST AFRICA

In 2024, Equipping Farmers International (EFI) made significant progress in the East Africa region, serving Uganda, Kenya, Tanzania, Rwanda, Burundi, South Sudan, and Ethiopia. This year, we trained **386 trainers** and reached **1,872 farmers** directly and indirectly, contributing to improved food security and spiritual growth.

Key Scripture

Our regional theme is inspired by Isaiah 58, emphasizing restoration, justice, and God's provision.

ISAIAH 58:11

And you shall be like a watered garden, like a spring of water, whose waters do not fail.

Key Achievements

- Increased food and nutrition security in most homes across the region.
- Achieved high crop yields through improved agricultural practices.
- Witnessed many souls won for Christ as farming became a platform for discipleship.
- Experienced joy and renewed purpose in farming among participants.
- Contributed economically through enhanced employment and community development.

Strengthening Faith Through Agricultural Discipleship

EFI's agricultural discipleship programs have deepened the faith of farmers in several ways:

- **Cultivation of a Prayerful Life:** Farmers are encouraged to pray before starting garden work, and many now regularly do so.
- **Reliance on God:** Training reminds farmers that while they plant and tend crops, it is God who gives the growth, fostering trust in God amid unpredictable circumstances.
- **Stewardship of Creation:** Many farmers now see themselves as stewards of God's land, taking responsibility for sustainability and caring for creation.
- **Community and Connection:** Farming has fostered stronger community bonds, with farmers supporting one another and sharing experiences, which has strengthened their faith journey.
- **Integration of Faith and Practice:** Some farmers now view their agricultural work as a direct expression of their Christian beliefs, overcoming the divide between spiritual life and daily work.

Impact on Churches and Communities

- **Financial Independence:** At New City Bible Church in Lira, Northern Uganda, church leaders began farming to supplement their operational budget. Selling produce at local markets has improved food security and is contributing to the church's financial sustainability.
- **Church Engagement and Growth:** Improved agricultural practices have led to increased income and reduced hardship, freeing families to participate more actively in church and community events. Greater food security has brought stability, hope, and motivation, resulting in stronger community bonds and increased church involvement.

Discipleship and Spiritual Growth

EFI's agricultural training programs have contributed to:

- **Practical Skill Development:** Training equips participants to improve yields and resource use, leading to food security and greater economic opportunities.
- **Sustainable Practices:** Emphasis on soil conservation, water management, and responsible resource use fosters stewardship and a holistic understanding of agriculture's role in society.
- **Empowerment and Leadership:** Training empowers individuals-especially youth and women-to lead in their communities, manage cooperatives, and advocate for sustainable practices.
- **Community Transformation:** Improved livelihoods and sustainable practices have led to broader community development and a ripple effect of positive change.

Success Stories

- **Eastern Kenya:** A farmer who had never harvested more than three 100-kg bags of maize per acre achieved seven bags from a small plot, becoming a community role model.
- **Bunyoro, Uganda:** Farmers have reported renewed hope and improved harvests, inspiring others in their communities.

Future Outlook
Top Priorities for 2025:

- Enhancing productivity and food security, especially for smallholder farmers, through expanded training and ongoing support
- Increasing food production and self-sufficiency via conservation agriculture and strategic partnerships
- Reducing post-harvest losses with improved storage and processing training
- Promoting climate change adaptation and mitigation through sustainable land management
- Engaging youth and women in agriculture to address unemployment and strengthen food security

Planned Expansions and Initiatives:

- Establishing model gardens and promoting farmer-to-farmer learning and exchange programs
- Rewarding extension agents and trainers for effective information dissemination
- Conducting research and development on staple foods
- Strengthening collaboration and partnerships, including hosting national and regional summits

SOUTH AND CENTRAL AFRICA

In 2024, EFI continued to grow its presence in the South/Central Africa region, serving countries including Eswatini, Zimbabwe, Malawi, Mozambique, DRC, and Zambia. This year, we trained **83 trainers** and **546 farmers** directly and indirectly, fostering a strong foundation for agricultural discipleship and community development.

Key Scripture

Our regional theme is inspired by **Isaiah 58:6-12**, guiding our mission to empower farmers and communities through sustainable agriculture and spiritual growth.

Key Achievements

1. National Training Team in Malawi: We developed a national training team in Malawi, certifying trainers who successfully conducted a farmers' training event in Zambia. This marked the first official 'second generation' farmers trained, a significant milestone in our regional expansion.

2. Strategic Partnerships: We strengthened our collaboration with strategic partners like Thirdmill in Zimbabwe and Zambia, and ELI in Malawi. These partnerships have been instrumental in enhancing our training programs and outreach.

3. Hybrid Ministry Design: We designed a hybrid program involving 12 churches, utilizing Sowers of Hope materials to disciple farmers over six months. This innovative approach integrates agricultural training with spiritual discipleship.

ISAIAH 58:6-12

"Is not this the fast that I choose:
to loose the bonds of wickedness,
to undo the straps of the yoke,
to let the oppressed go free,
and to break every yoke?
Is it not to share your bread with the hungry
and bring the homeless poor into your house;
when you see the naked, to cover him,
and not to hide yourself from your own flesh?
Then shall your light break forth like the dawn,
and your healing shall spring up speedily;
your righteousness shall go before you;
the glory of the Lord shall be your rear guard.
Then you shall call, and the Lord will answer;
you shall cry, and he will say, 'Here I am.'
If you take away the yoke from your midst,
the pointing of the finger, and speaking wickedness,
if you pour yourself out for the hungry
and satisfy the desire of the afflicted,
then shall your light rise in the darkness
and your gloom be as the noonday.
And the Lord will guide you continually
and satisfy your desire in scorched places
and make your bones strong;
and you shall be like a watered garden,
like a spring of water,
whose waters do not fail.
And your ancient ruins shall be rebuilt;
you shall raise up the foundations of many generations;
you shall be called the repairer of the breach,
the restorer of streets to dwell in.

Strengthening Faith Through Agricultural Discipleship

Agricultural discipleship has profoundly impacted the faith of farmers in our region. By integrating farming into the church experience, we have seen:

- **Year-Round Engagement:** Farmers recognize that farming requires continuous attention, leading to improved field management and increased production.
- **Restoring Dignity:** Interactive learning sessions have restored dignity to the learning process, encouraging older participants to share their wisdom with younger generations, which has led to higher church attendance.
- **Biblical Context:** Demonstrations, such as using mulch in Zimbabwe, have shown the practical benefits of biblical agricultural methods, sparking interest in informal learning sessions.

Success Stories

- **Zambia Success Story:** A published success story from Zambia highlights the impact of our training with a Thirdmill group.
- **Bulawayo, Zimbabwe:** A developing story involves a pastor who implemented our training and is now organizing further training for his fraternity, integrating theological education with agricultural practices.
- **Empowering Local Schools**: A church-sponsored participant implemented Pfumvudza plots at a local primary school, demonstrating the potential for community empowerment through our training.

Future Outlook

For the coming year, our priorities include:

EFI/Sowers of Hope Hybrid Training: Implementing a hybrid training program involving 12 churches and 24 participants over seven months.
Supporting Farmer Trainings: Supporting about 10 farmer trainings conducted by our certified trainers across Southern and Central Africa.

New Initiatives

- **Expansion to New Countries:** We plan to introduce our ICCA training in Congo Brazzaville in July 2025 and three locations in Angola in September 2025.
- **Pilot Hybrid Program:** Launching a pilot hybrid EFI/Sowers of Hope program with 30 participants from 12 churches in Bulawayo, focusing on lead trainer development and exploring market linkages.

SOUTH ASIA

In 2024, EFI continued to make significant strides in the South Asia region, which includes Indonesia, Thailand, and other countries. This year, we trained **315 trainers** and **450 farmers** directly and indirectly, leveraging agriculture as a powerful tool for discipleship and community development.

Key Scripture

Our regional theme is rooted in **Genesis 1:30**, where God declares that He gives all green plants as food for all living creatures. This verse guides our mission to empower farmers and communities through sustainable agriculture.

GENESIS 1:30

And to every beast of the earth and to every bird of the heavens and to everything that creeps on the earth, everything that has the breath of life, I have given every green plant for food." And it was so.

Key Achievements

1. Launch in Indonesia: We successfully launched our program in Indonesia, particularly in regions that rely heavily on neighboring provinces for food. This initiative has been instrumental in enhancing food security and economic stability.

2. Opening Doors in Restricted Countries: Through farming, we have been able to open doors in restricted South Asian countries, providing a platform to share the Gospel in challenging environments.

3. Implementation in Remote Islands: Our model has been extensively implemented in remote Indonesian islands, transforming agricultural practices and improving livelihoods.

4. Equipping Church Planters in South Asia: Our program has equipped church planters with the skills to use farming as a gospel tool, enabling them to feed their families and support their ministries.

Strengthening Faith Through Agricultural Discipleship

Agricultural discipleship has significantly strengthened the faith of farmers in our region. By integrating faith and farming, we have seen farmers draw closer to God and open their hearts to spiritual growth. In South Asia, where religious restrictions are high, farming has become a vital means to share the Gospel and foster community engagement.

Success Stories

- **Nias Island:** On Nias Island, where farming had been largely forgotten, we trained the next generation of farmers, primarily students. This initiative not only revived agricultural practices but also helped feed families and support local orphanages. Participants running an orphanage home began training children in farming, ensuring a sustainable food source for the children.
- **Pastor and Farmer**: One of our trained farmers, who is also a pastor, has successfully used farming to feed his family and raise funds for his ministry. His remarkable harvests have attracted community attention, creating opportunities to serve and share the Gospel with people from different faith backgrounds.

Future Outlook

For the coming year, our priorities include:

- **Expansion to Underdeveloped Islands**: We aim to train church leaders in underdeveloped Indonesian islands like West Papua and East Timor to enhance food security and community development.
- **Expansion to Nepal and New Islands**: We plan to expand our operations to Nepal and additional Indonesian islands, furthering our mission to empower farmers and communities.

New Initiatives

- **Crop Diversification**: We are piloting new crops such as wheat, barley, and white onions to enhance agricultural diversity and resilience.
- **Children's Curriculum**: We are developing a curriculum for children to equip the next generation with farming skills and spiritual values.
- **Chemical-Free Farming**: Our region is focusing on chemical-free farming practices, which have gained significant appreciation and demand within local communities.
- **Video Documentation**: We are exploring video documentation as a tool to improve yield and serve as a growth booster for farmers.

EAST AND SOUTHEAST ASIA

In 2024, Equipping Farmers International (EFI) established a foundational presence in the East/Southeast Asia region, serving Thailand, Laos, and Myanmar. During this initial phase, we trained **17 trainers** and **6 farmers** directly and indirectly.

Key Scripture

Our regional work is guided by Genesis 27:28. This scripture underscores God's promise of provision through the land.

> **GENESIS 27:28**
> *May God give you heaven's dew and earth's richness—an abundance of grain and new wine.*

Key Achievements

1. Regional Leadership: A Regional Director was identified, and support raising began in June 2024.

2. First ICCA Training: The inaugural ICCA training for the region was successfully completed in September 2024, equipping 23 individuals from Thailand, Laos, and Myanmar.

Strengthening Faith Through Agricultural Discipleship

During the September ICCA training, interactions and discussions with church leaders revealed the impact of recognizing God's promise to provide through farming. There was tangible evidence of hope being restored and participants gaining fresh ideas for implementing the agricultural principles they learned.

Future Outlook

Our priorities for the coming year include:

- Providing additional ICCA and potential Farmers Training for groups already trained.
- Continuing to raise support for the Regional Director to enable full-time work.

Planned Expansions

We anticipate exploring continued work in Myanmar and Laos, and potentially expanding into Cambodia, Pakistan, the Philippines, and Vietnam.

FINANCIAL STATEMENT

Comparative Statement of Activities Year Ended December 31, 2024

SUPPORT EFI

FAMILY LEVEL - $40/MONTH

Disciple one family per month in the EFI program. In one year, this will transform a church's economy, as 12 families contribute a Pfumvudza plot to help their neighbors and increase income and giving to their local church..

TRAINER LEVEL - $100/MONTH

Sponsor a trainer with a monthly contribution of $100. Countless families will be trained in sustainable farming methods resulting in improved food security, income generation, and self-sufficiency.

ONE-TIME GIFTS

One-time gifts can be designated toward any number of projects, including the full sponsorship of trainers, the training of an entire church, or community-supported hand-drilling of wells.
